IBM Db2 Warehouse on Cloud launches single-node elastic cloud data warehouse

Overview

IBM(R) Db2(R) Warehouse on Cloud is an elastic, fully-managed cloud data warehouse service that is powered by IBM BLU Acceleration(R) technology for increased performance and analytics at scale.

A single-node elastic cloud data warehouse plan is now available for Db2 Warehouse on Cloud. This Flex One plan is ideal for clients with smaller data volume sizes that range from tens of gigabytes to several terabytes, and for larger enterprise clients that require a development or test environment for cloud.

As with the Flex and Flex Performance plans, the Flex One plan provides the capability to independently scale storage and compute, enabling an organization to:

- Fully customize data warehouse according to business needs
- Scale storage and compute by using a web interface or through a REST API
- Schedule and script scaling operations to anticipate future scaling requirements
- Gain self-service backup and restore capabilities for improved control of backup and restore on demand functions

Key requirements

An internet connection is required.

Planned availability date

April 23, 2019

Accessibility by people with disabilities

A US Section 508 Accessibility Compliance Report containing details on accessibility compliance can be found on the Product accessibility information website.

Statement of general direction
Db2 Warehouse on Cloud Flex One will be offered first to IBM clients that are located in the US South region. Expansion to other major IBM Cloud™ regions is planned in the second half of 2019.

Statements by IBM regarding its plans, directions, and intent are subject to change or withdrawal without notice at the sole discretion of IBM. Information regarding potential future products is intended to outline general product direction and should not be relied on in making a purchasing decision. The information mentioned regarding potential future products is not a commitment, promise, or legal obligation to deliver any material, code, or functionality. Information about potential future products may not be incorporated into any contract. The development, release, and timing of any future features or functionality described for IBM products remain at the sole discretion of IBM.

Terms and conditions
The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction for the acquisition of cloud services from IBM consist of either the IBM Cloud Services Agreement and the applicable offering Service Description or the IBM International Passport Advantage Agreement or the International Passport Advantage Express Agreement and the IBM Terms of Use - General Terms for Cloud Offerings and the applicable offering Service Description.

**Technical support**

Technical support is provided for cloud services and enabling software, as applicable, during the subscription period. Any enhancements, updates, and other materials provided by IBM as part of any such technical support are considered to be part of the cloud service, as applicable, and therefore governed by the applicable agreement as defined in client's quote or transaction document. Technical support is included with the cloud service and is not available as a separate offering.

Additional technical support information for this cloud service offering may be found in the IBM Support Guide or in service-specific documentation.

**Service Description**

The following Service Description document applies to the offering in this announcement.

**Statement of good security practices**

IT system security involves protecting systems and information through intrusion prevention, detection, and response to improper access from within and outside...
your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a regulatory compliant, comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective.

**Important:** IBM does not warrant that any systems, products, or services are immune from, or will make your enterprise immune from, the malicious or illegal conduct of any party.

### Prices

**Business Partner information**

If you are an IBM Business Partner acquiring products from IBM, you may link to Passport Advantage Online for resellers where you can obtain Business Partner pricing information. An IBMid and password are required to access the IBM Passport Advantage website.

**Passport Advantage**

For Passport Advantage information and charges, contact your IBM representative or authorized IBM Business Partner for Channel Value Rewards. Additional information is also available on the Passport Advantage and Passport Advantage Express website.

### Order now
