

Our Mission: Hacking Anything to Secure Everything

Long Description:

X-Force Red

Our Mission: Hacking Anything to Secure Everything

X-Force Red offers Offensive Security Services which includes penetration testing, vulnerability management services, adversary simulation, code review, static analysis and vulnerability assessments. Their goal is to help security leaders identify and remediate security flaws that could expose their digital and physical ecosystem to an attacker.

As part of X-Force Red's penetration testing services, the team performs manual tests against applications, networks, hardware, devices and personnel. Through the X-Force Red Portal, security leaders can see testing results as X-Force Red uncovers each vulnerability, so that remediation can begin immediately.

X-Force Red's Vulnerability Management Services (VMS) includes scanning to identify vulnerabilities, automated prioritization and remediation facilitation. After a scan, X-Force Red automatically ranks vulnerabilities by correlating threat intelligence that shows if a vulnerability can be exploited by an attacker, with the criticality of the asset at risk. Once vulnerabilities are prioritized, X-Force Red facilitates the remediation process, ensuring the most critical vulnerabilities are delivered to the appropriate remediators and confirming the vulnerabilities are patched.

X-Force Red Adversary Simulation involves simulating an attack, using the same tactics, techniques and procedures as advanced attackers, to evaluate how well clients' security "blue" teams can detect and respond. The service is comprised of two parts – red teaming and purple teaming/control tuning

X-Force Red can do whatever criminal hackers can do, but with the goal of helping security leaders harden their defenses and protect their most important assets.

Short Description/Boilerplate

X-Force Red is an autonomous team of veteran hackers hired to break into organizations and uncover risky vulnerabilities that attackers may use for personal gain. X-Force Red offers Offensive Security Services which includes penetration testing, vulnerability management services, red teaming, code review, static analysis and vulnerability assessments. Their goal is to

help security leaders identify and remediate security flaws that could expose their digital and physical ecosystem to attackers.

Elevator Pitch:

X-Force Red is an autonomous team of veteran hackers who can break into anything and identify the riskiest vulnerabilities in your organization.

Audience:

CISO/CIO, CRO, CCO (Chief Compliance Officer), IT Security Managers, VP of Development & Development Leaders
